

ICA BaseLine Series

...designed for perfect signals

IF Active Combiners (8-way, 16-way)

The ICA Baseline series represents professional active IF combiners in a compact 1RU/19" rack mount chassis, especially designed for RF distribution applications where excellent, stable and accurate signal quality and performance is necessary.

The units are available as 8-way or 16-way active combiners and operate at the IF frequency range 40 – 200MHz.

Additionally, they feature RF power monitoring and come with 1:1 redundant dual power supply.

Front side status LED's indicating and monitoring the health status of the unit. Remote configuration, monitoring and alarming can be done via an RJ45 Ethernet-Interface (WebGUI, SNMP).
