

RAPID DEPLOY KIT

ENABLED BY STARLINK

ALL-IN-ONE, PORTABLE COMMUNICATION

In disaster response, where every second counts, Speedcast's Rapid Deploy Kit provides essential connectivity using Starlink's high-speed, low-latency technology. The Rapid Deploy Kit is custom-designed to host the Starlink Flat High Performance Kit and a network device, all conveniently packaged in a portable case*. This makes it an ideal solution for on-the-go first responders or remote workers in various sectors such as media, mining, energy, government, or NGOs.

*Starlink Kit and network devices are not included; sold individually.

PORTABLE

- The Rapid Deploy Kit is custom-designed to host the Starlink kit and peripheral equipment, allowing for quick turnaround to any global destination. (Starlink kit sold separately.)
- Assembly time is less than 15 minutes with minimal maintenance

EASY TO DEPLOY

- The Rapid Deploy Kit is designed to be set up by one person
- Comes with a network device, which is simple to install and is integrated with existing infrastructure
- A cloud-based network, email and firewall management options available

GLOBAL

- The Rapid Deploy Kit provides high speed internet services from anywhere in the world
- High-speed broadband connectivity delivered over Low Earth Orbit (LEO) satellites
- Upon ordering, the Rapid Deploy Kit is delivered to your doorstep
