ABOUT

The **Drive Reach Overland Extended** is our newest kit, specially designed to extend the inside signal further within your overland vehicle with the Mini In-Vehicle Panel Antenna. Also included, is a hardwire power supply for a permanent power connection, as well as an 18 foot cable to accommodate longer cable routing needs in larger vehicles. This kit sports the same durable, all-weather omni antenna, providing maximum connectivity. Overlanding enthusiasts will appreciate the versatile mounting hardware – enabling them to attach the outside antenna in multiple ways. The outside antenna can also be folded down for when a vehicle is stored inside.

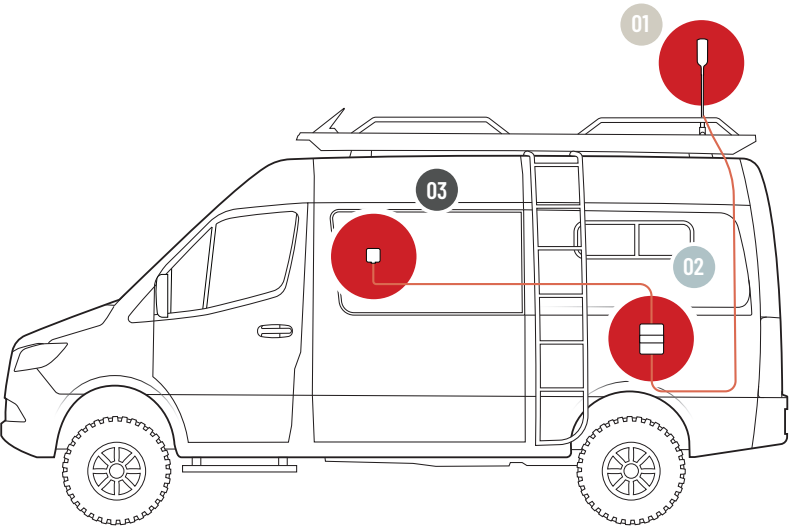

The Drive Reach Overland enhances all available network signals up to 32x. Drivers experience fewer lost connections and dead zones, better audio quality, and faster data uploads and downloads with this new signal booster. All components needed for installation come in one package. The Drive Reach Overland works with all cellular devices and all US carriers.

HOW IT WORKS

- 01 **Outside antenna:** The outside antenna communicates back and forth with nearby cell towers.
- 02 **Booster:** The booster amplifies any cell signals it receives from the outside antenna.
- 03 **Inside antenna:** The inside antenna broadcasts these signals for use throughout the RV.
