ABOUT

The **weBoost Home Studio** cell signal booster provides a strong solution for weak indoor cellular coverage in home offices, living rooms, or apartments. It's engineered to increase network speeds across several signal bands in a large room. Additionally, it's ready for 5G and will continue to boost cell signal for the next decade and beyond. The Home Studio also benefits from an easier installation with an inside antenna that attaches directly to a powerful booster. Once installed, customers will experience fewer missed messages, better voice and video quality, and faster data speeds. The booster kit supports multiple users and devices at one time. It's compatible with AT&T and Verizon networks. Proudly designed and assembled in the USA, all weBoost booster kits are backed by a 2-year warranty and 30-day money-back guarantee.

HOW IT WORKS

- 01 Outside antenna:** The outside antenna communicates back and forth with nearby cell towers.
- 02 Booster:** The booster amplifies any cell signals it receives from the outside antenna.
- 03 Broadcasts signal:** The attached antenna then broadcasts the amplified cell signal to your device. You receive a stronger signal as calls and data are fed through the booster back to the network.
